

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the considered flat fee proposal, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

Since I only make approximately 2 or 3 long distance calls within a one (1) month period and I only use my prepaid cell phone in necessary and/or emergency situations while outside my home, why should I have to pay the same fee that someone else does who has 200 long distance calls ???

I use my wireless phone for safety, and security. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,
